HIGHLIGHTS: FEBRUARY 2021

The Producer Price Index for the *Mining and Quarrying* industry increased by 0.8 per cent for February 2021. The main contributor to this movement was a similar increase of 0.8 per cent in the index for the major group 'Bauxite

Mining & Alumina Processing'. The index for the major group 'Other Mining & Quarrying', rose by 0.2 per cent.

For the period under review, the Manufacturing industry recorded an increase of 2.4 per cent in its index. Contributing to this movement were the major groups; 'Refined Petroleum Products' which moved up by 10.6 per cent, 'Food, Beverages & Tobacco' which moved up by 0.6 per cent and 'Wood, Wood Products and Furniture' which moved up by 4.8 per cent. (Table II)

POINT-TO-POINT

For the period February 2020 - February 2021, the index for the *Mining & Quarrying* industry rose by 9.8 per cent. This upward movement was attributed to an increase of 10.0 per cent in the index for the major group 'Bauxite Mining & Alumina Processing'. The point-to-point index for the *Manufacturing* industry moved up by 3.5 per cent. (Table II)

FISCAL YEAR

For the 2020/2021 fiscal year-to-date, April 2020 - February 2021, the index for the *Mining & Quarrying* industry increased by 25.3 per cent, while the index for the *Manufacturing* industry recorded an upward movement of 6.6 per cent. (Table III)

In calculating the PPI for the current period, the average exchange rate for the previous month is used. The assumption is that producers would not have purchased their raw materials in the current month.

Main Findings

MINING & QUARRYING

The index for the *Mining and Quarrying* industry increased by 0.8 per cent for February 2021. This movement was mainly attributed to a similar increase of 0.8 per cent in the index for the major group '*Bauxite Mining & Alumina Processing*'. The index for the other major group in this industry, '*Other Mining and Quarrying*' increased by 0.2 per cent. These upward movements were due to the depreciation of the Jamaican dollar against the United States dollar. (Table II)

MANUFACTURING

For February 2021, the index for the *Manufacturing* industry rose by 2.4 per cent. The main contributors to this movement were increases in the index for the following major groups: '*Refined Petroleum Products*' 10.6 per cent, '*Food, Beverages & Tobacco*' 0.6 per cent and '*Wood, Wood Products and Furniture*' 4.8 per cent. (Table II)

FOOD, BEVERAGES & TOBACCO

The index for the major group '*Food, Beverages & Tobacco*' increased by 0.6 per cent. The main contributor to this upward movement was the group '*Manufacture of Grain Mill Products, Starches and Starch Products*' which increased by 2.7 per cent. The group '*Production, Processing & Preserving of Meats, Fish, Vegetables, Oils and Fats*' moved up by 0.4 per cent. This was largely the result of an advance of 0.5 per cent in the index for the sub-group '*Meat & Meat Products and Fish and Fish Products*'. These upward movements were due to higher packaging and raw material costs.

The index for the group '*Manufacture of Other Food Products*' rose by 0.2 per cent. . This increase was mainly attributable to upward movements in the index for the following sub-groups; '*Sugar, Cocoa, Coffee, and Chocolate & Sugar Confectionery*' (0.6%) and '*Seasoning, Spices, Sauces and Condiments*' (0.2%). The index for the group '*Manufacture of Beverages and Tobacco*' increased by 0.1 per cent. These upward movements were due to the depreciation of the Jamaican dollar against the United States dollar. (Table II)

OTHER MAJOR GROUPS IN MANUFACTURING

The index for the '*Refined Petroleum Products*' major group, increased by 10.6 per cent due to higher prices for crude oil on the international market.

The index for the following major groups recorded increases: '*Wood, Wood Products and Furniture*' up by 4.8 per cent and '*Chemical and Chemical Products*' up by 0.3 per cent. Both movements were due to higher overhead and raw material costs. The index for the group '*Fabricated Metal Products excl. Machinery & Equipment*' increased by 0.1 per cent, and '*Textile, Wearing Apparel and Leather Products*' moved up by 0.3 per cent. These increases were as a result of the depreciation of the Jamaican dollar against the United States dollar. (Table II)

GLOSSARY OF IMPORTANT PPI TERMS

BASE PERIOD

The point in time used as a reference period for comparison with other time periods. The base period used for this PPI is 2008. The values of the base period provide the weights for a price index.

INDUSTRY

An industry consists of a group of establishments engaged in the same or similar kinds of economic activity, e.g., mining and quarrying, manufacturing, etc.

INFLATION

Inflation is the overall general upward movement of the prices of goods and services in an economy.

PRODUCER'S PRICE

The amount the producer receives from the purchaser for a unit of good or service produced as output. It excludes all deductible tax, supplier's retail and wholesale margins and separately invoiced transport and insurance charges.

PRODUCER PRICE INDEX (PPI)

An index designed to measure the average change in the price of goods and services either as they leave the place of production or as they enter the production process. This index can be based on either output or input prices.

OUTPUT PPI

An output PPI, (as is computed for Jamaica), is a measure of the change in the prices of finished goods and services that are either sold on the domestic market or exported. The prices of finished goods are monitored because they are the best measure of what purchasers will actually have to pay.

'PURE' PRICE CHANGE

This represents the change in the price of a good or service whose characteristics do not change over time.

WEIGHTS

Weights are a set of numbers between zero and one that sum to unity, and are used when calculating averages. It is the value assigned to each item that is indicative of its relative importance when combined with all other items. It is used to represent the impact of a particular price change on the overall index.

Further Information on the PPI can be obtained from the STATIN brochure "*Producer Price Index, A Tool for Economic Analysis*". Monthly PPI data are available in the Producer Price Index Monthly Bulletin and on the STATIN website at www.statinja.gov.jm . Information on the entire PPI series, including revisions are available from STATIN's Library.
